

Tis the Season to Reflect ...

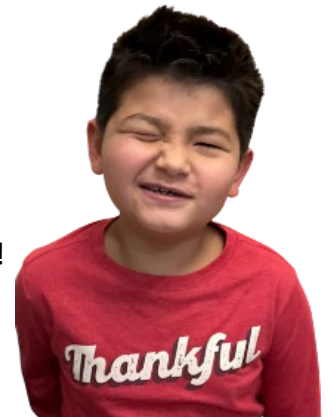

December 2019, we found out that William was having seizures. We thought our questions were answered to his delays and it was just a mild case of epilepsy --until the genetic testing results came back a month later, confirming he lives with Angelman syndrome.

The last 5 years have been quite a journey. While we know it's not over yet, we do know that we wouldn't have the strength to carry on and fight if it weren't for our family & friends! Thank you and we wish you all a joyful holiday season!

xoxo, the Edbergs

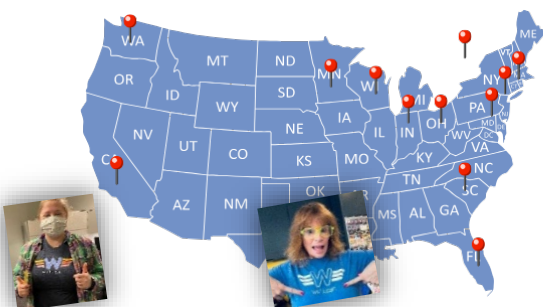

The Impact of Your Generosity.

Your donations, small and large, over the last 5 years have made a HUGE impact. HUGE! TOGETHER, we have raised over \$866,000 and donated over \$835,000 to the [Foundation for Angelman Syndrome Therapeutics](#) (FAST) whose mission is to **Cure Angelman Syndrome!** (Learn about the [impact & progress](#) made by FAST and the AS community).

A look ahead into 2025.

- **Jan 29:** The AS community has an externally led-patient focused drug development meeting with the FDA – we are very lucky for this opportunity to share our voices with the FDA as they are the ones making decisions for an approved therapeutic.
- **Feb 15:** [International Angelman Day](#) - Go blue and help us bring awareness with others around the world!
- **Mar 4-5:** Angelman advocates will join together on Capitol Hill in Washington, DC
- **Stay tuned for Will.i.CAN events** as we will not stop fundraising or raising awareness until there is an approved therapeutic accessible to William, and all individuals living with AS!
- **Clinical Trial Update:** There are 2 investigational human clinical trials moving to Phase 3 in 2025 (Phase 3 is the last phase before FDA approval and to patients)! There is also data which continues to support the development of an adeno-associated virus gene therapy into a Phase 1/2 clinical trial in the near future!
