

What's New with William:

In the last 3 months, William has been very busy:

- Walks about 90% of the day now, stands independently, is working on uneven terrain and stairs.
- Does a great job following simple directions and is starting to make choices and learn to communicate with picture cards
- Is doing “virtual” speech and physical therapy during the Stay at Home order

In addition, he went to Palm Springs, CA to visit his grandparents, loves swinging now on a big boy swing and going down the playground slide, and is being a great big brother.

Update on a Cure:

Several of FAST-funded programs, specifically in the gene therapy and gene-altering therapy space, are now moving towards the clinic. These are unbelievably exciting times for the Angelman community!

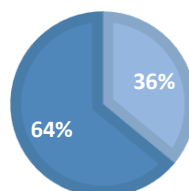

Fact of the Month:

AS is a rare neurological disorder impacting approximately 1 and 15,000 people

2020 WILL.I.CAN FUNDRAISER GOAL IS \$10,000
