

Tis' the Season to be Grateful

Dear Friends & Family,

You are THE.BEST.CREW. anyone could ever ask for. You showed up beyond our wildest dreams since our diagnosis on 1/7/20. Just to recap how amazing you all are, here are the details:

- Over 195 families have shown support – family, old friends, new friends, coworkers, and even friends of friends!
- You helped us raise **\$89,627.77** thru donations + t-shirt orders. Not bad for our rookie year!
- Many of you walked on a rainy day in September in our 1st & Virtual Angelman Syndrome Foundation Walk
- We received so many messages of encouragement that has given us the strength to stay positive and fight for William.

William is doing great in his new daycare classroom and is loving going to pre-school through the school district. We are very proud of him and are learning it'll be a lifetime of feels seeing him both thrive and also being reminded of his setbacks. Having friends and family like you all to lean on during the feels is something we truly value and we appreciate you all so much.

As 2020 is coming to a close, we wish you all a safe, happy, and healthy holiday season.

With sincere gratitude,

The Edbergs

You are funding a cure!

Exciting News Just Released in Oct 2020!

Phase 1/2 Clinical Trial Announces Positive Interim Data

What does that mean?

Results from the first 5 patients treated indicate substantial improvements in all patients in at least two disease domains including communication, behavior, sleep, gross motor function, and fine motor function. **Two previously nonverbal patients began using words, one reaching 9 words!**

"These initial findings raise the possibility of improving some of the significant symptoms of Angelman syndrome." - Emil D. Kakkis, M.D., Ph.D.

"So far we are seeing rapid improvements in multiple areas, including some kids doing things they've never done before, and I don't believe this rate of progress in development skills has been seen before in Angelman syndrome." - Elizabeth M. Berry-Kravis, M.D., Ph.D.
