

grateful for you

Thank you for your donations of time and money, t-shirt purchases, participating in events, and emotional support. Wishing you all a safe & happy holiday season!

xoxo, The Edbergs

William's Fall Fun!

- Climbing the rock wall
- Eating with a fork
- Unsure about the MN Ren Fest
- Dressing as Spider Man
- Painting at school
- Scrolling YouTube

fun science updates

[GeneTx and Ultragenyx](#) in receiving clearance in Canada, UK for enrollment in GTX-102 clinical studies; dosing in Canada; resuming dosing in US and anticipate dosing in UK before year's end.

- AKA Clinical trial to turn on dad's silenced gene to replace function for mom's defected gene!

FAST, Angelman Syndrome Foundation (ASF), Dup15q Alliance and Foundation for Prader-Willi Research (FPWR) have united to add Angelman syndrome, Prader-Willi syndrome and Dup15q syndrome to the [Early Check Newborn Screening Panel](#).

- This helps identify infants with conditions such as these before symptoms emerge. Now, the ability to provide early treatment and eliminate the stress of diagnostic odyssey is a reality for our community.
- See how much money that took below!

2021 CAN Funds Raised:

Will.I.CAN Crew: \$170,812

Total CAN: \$891,000

We raised 19% of the total!

How much science costs →

Science Item	University	Cost
Outcome measurement assessment for patients with Angelman syndrome	Duke University	\$77,875.00
Isogenically controlled human cell lines targeting aberrant imprinting genotypes and a new reporter cell line.	North Carolina State University	\$334,786.00
Add AS, Prader-Willi and Dup15q syndromes to the Early Check Newborn Screening Panel	Research Triangle Institute (RTI)	\$154,082.25
MiRNA Program	University of Pennsylvania	\$575,308.24
IND enabling Studies Requested by FDA for HSC therapy in AS	UC Davis	\$905,155.00
